

## What Do You Think?

**Less than half-way through the experimental testing period, with more deaths in the first 120 days of 2021 than all vaccine deaths in the last decade, should the experiment be stopped?**

In 2018, there were 119 vaccine-related deaths reported to the vaccine Adverse Events Reporting System (VAERS). In 2019, there were 203.

In the months since the COVID vaccine rolled out, there have been [5,888 deaths reported...](#) as of June 4th (and the numbers keep climbing).

They estimate that between 1 and 10% of all adverse reactions to vaccines are actually reported and make their way into the VAERS database, which would suggest that the numbers are actually *much higher*.

Here are some other shocking statistics:
